PROFESSIONAL SUMMARY

Proactive Python Full-Stack Developer with 3+ years of experience designing high-throughput REST APIs, architecting relational databases

CORE TECHNICAL SKILLS

- Programming: Python, SQL, JavaScript, HTML5, CSS3, Bash
- Frameworks: Flask, Django, FastAPI, SQLAlchemy
- Databases: PostgreSQL, SQLite, MySQL, Redis
- Developer Tools: Git, GitHub, Docker, Postman, Linux, Pytest, REST APIs

PROFESSIONAL WORK EXPERIENCE

Backend Software Developer | Nexus Cloud Solutions (2022 - Present)

- Engineered 15+ RESTful API microservices using Python and Flask, handling 50,000+ daily requests with 99.9% uptime.
- Optimized slow PostgreSQL queries with composite indexing and query rewriting, reducing database response time by 42%.
- Integrated secure JWT session authentication, password hashing with PBKDF2, and CORS protection.
- Authored 120+ unit and integration tests using Pytest, boosting code coverage from 55% to 88%.

Junior Python Developer | Apex Software Labs (2021 - 2022)

- Built internal analytics dashboards using Python, Flask, and SQLite for tracking client onboarding metrics.
- Automated weekly data ETL workflows with Python scripts, saving 8 hours of manual engineering effort per week.
- Collaborated in an Agile/Scrum team of 6 engineers using Git version control and pull request code reviews.

KEY TECHNICAL PROJECTS

1. SkyGuard AI Career Assistant:

- Full-stack web application developed using Python, Flask, PyMuPDF, and SQLAlchemy.
- Implemented ATS text extraction, structured JSON parsing, and deterministic fallback scoring.

2. Distributed Task Queue:

- Built a distributed asynchronous background job worker in Python and Redis supporting delayed task execution and failure retries.

EDUCATION

Bachelor of Science in Computer Science

State Institute of Technology (2017 - 2021) | GPA: 3.8 / 4.0

- Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Operating Systems, Web Engineering.
